VAPCELL K30: AN INEXPENSIVE ALTERNATIVE TO THE SAMSUNG 30Q

These are a great cell that performs almost as well as the very popular Samsung 30Q, but this one is approved for vaping purposes. It's also cheaper than the 30Q. Not to mention, it comes with a great zip up case if you buy in multiples of 2.

and beyond your expectations. And we test every shipment to ensure consistent quality.

Batteries are sold individually.

If your battery is damaged or defective on arrival (will not take its first charge, or has issues with its first cycle), please let us know within 14 days of receiving your order and we'll make it right. Please read our [complete store policy on defective products here](#) for more information and to see if you're eligible.

Manufacturer ratings: Please see more information regarding manufacturer ratings [here](#).

BATTERY WARNING

Warning: Lithium ion batteries may explode or burn due to improper use. Using these batteries for purposes not intended by the manufacturer, including outside a battery pack and/or without a BMS, may cause severe injury and damage. We are not responsible for any injuries caused by lithium ion batteries - use at your own risk.

All rechargeable batteries have inherent risks under any circumstance. Use caution with working with li-ion batteries (lithium-ion), LiPo (lithium ion polymer), and any rechargeable cells (together "rechargeable batteries"), as they have dangerous charging characteristics and are known to explode or burn if mishandled. A purchaser and user of rechargeable batteries should educate themselves on rechargeable batteries, especially as to charging, discharging, assembly, and storage. Learn more about proper storage and care for rechargeable batteries [here](#). We are not responsible for any damage caused by the misuse or mishandling of rechargeable batteries.

Here are a few tips:

Never completely discharge batteries (below 2.5V under load or 3V unloaded)

Charge fully (to 4.2V) before first use

Never charge batteries to 4.3V or above

Do not charge unattended

Do not store your li-ion batteries fully charged for an extended period of time (weeks or more)

If you must store your battery, only store in a case or individual box in a cool and dry place at approximately 3.6-3.7V

Use only high quality battery chargers

Do not expose to heat

Do not connect the positive contact to the negative contact without an appropriate load

Never exceed the battery's specifications

Never try to charge or discharge li-ion batteries with battery chargers that are not made for li-ion batteries

Always charge these batteries on and within fireproof material

Never leave rechargeable batteries in a recharging station unattended

Always store and transport rechargeable cells in a safe, non-conductive container (never keep a spare battery loose in a pocket, purse, etc. and always use protective cases)

Properly dispose of all battery cells and chargers in accordance with local laws and mandates (if you're unsure, contact your local municipality)

If a rechargeable battery overheats, hisses, or bulges, immediately quarantine the battery from any combustible materials - ideally, take the battery outside

If a rechargeable battery catches fire, the FAA recommends pouring water or soda on the battery and surrounding areas - ideally, use a foam extinguisher to quell the fire

What device/application do you use this with?

Squid Double Barrel v2

Worst 18650s ever ordered - Not sure why Liion would even sell them

The good.

The battery cases are nice.

The bad.

Everything else. Out of six pairs of these and the K30 in two weeks time, two batteries are totally bad. Half barely hold a charge and die nowhere near where they should for their capacity. At this rate I expect all 12 batteries to be bad in three months. Compared to two year old Sony or Samsung batteries that still work better than some of these two week old ones. Total screw- STAY AWAY

Hello - Thank you for your review and for your input regarding these cells. Our team has been monitoring these cells and trying to decide on whether or not to continue to sell them. However, we have seen that a lot of our customers have had good luck with them so far.
